

### CHARACTERISTIC DETAILS

- Plan** Irregular massing of exterior details reflected a free-form interior plan.
- Doorway** Typically four-panel door with no or narrow sidelights. In Queen Anne style the upper half was often glass with small leaded panes.
- Windows** Long and narrow. In the Queen Anne style bay and multi-shaped windows were common.
- Roofline** Steep, with presence of multiple gables. Verandas, porches, and projecting eaves were typical.
- Materials** Mixture of materials and textures. Variety in color was common in Queen Anne buildings.
- Decorative elements** Predominance of "gingerbread" details (brackets, hanging pendants, and rows of spindles). Chimneys with paneled brick, turrets, and colored-glass windows typified the Queen Anne style. "Stickwork" (clapboards overlaid with vertical, horizontal, or diagonal boards) is a feature of the Stick style.
